Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-77. canceled.

78. (Previously presented) A method of treating an immune disease in a subject, comprising parenterally administering to a subject that has been diagnosed with an immune disease a therapeutically effective amount of a sterile injectable composition comprising an antibody or antibody fragment specific to a marker associated with a B cell in a pharmaceutically acceptable injection vehicle.

79. (Previously presented) A method according to claim 78, wherein the subject has been diagnosed with immune thrombocytopenic purpura.

80. (Previously presented) A method according to claim 78, wherein the antibody or antibody fragment is a Fv, single chain antibody, Fab, Fab', or F(ab')₂ fragment.

81. (Previously presented) A method according to claim 78, wherein the antibody or antibody fragment is an intact antibody.

82. (Previously presented) A method according to claim 78, wherein the antibody or antibody fragment is conjugated to a therapeutic agent.

83. (Previously presented) A method according to claim 78, wherein the therapeutic agent is a cytotoxic agent.

84. (Previously presented) A method according to claim 83, wherein the cytotoxic agent is a therapeutic radioisotope.

85. (Previously presented) A method according to claim 83, wherein the therapeutic agent is a drug.

86. (Previously presented) A method according to claim 83, wherein the therapeutic agent is a toxin.

87. (New) A method according to claim 83, wherein said antibody or antibody fragment is an LL2 antibody or antibody fragment.

88. (New) A method according to claim 87, wherein said antibody or antibody fragment is an intact LL2 antibody.
